

NYS required BMI Survey

As part of the required school health examination, a student is weighed and their height is measured. These numbers are used to figure out the student's body mass index or "BMI". The BMI helps the doctor or nurse know if the student's weight is in a healthy range or is too high or too low.

Recent changes to the New York State Education Law require that BMI and weight status groups be included as part of the student's school health examination. We will be reporting to the New York State Department of Health information about our students' weight status groups every other year.

Only summary information is sent. No names and no information about individual students are sent. The information sent to the Department of Health will help health officials develop programs that make it easier for children to be healthier. If you do not wish to have your child's weight status group information included as part of the survey this year, please print and sign your name below and return this form to your child's nurse.

Melissa Dimon RN
School Nurse
Fabius-Pompey Middle-High School
